

# PENNSYLVANIA HEALTH INCIDENT MANAGEMENT SYSTEM

PENNSYLVANIA DEPARTMENT OF HEALTH PROVIDES A STATEWIDE SYSTEM TO ALLOW HOSPITALS, LONG-TERM CARE FACILITIES, EMS AGENCIES, HEALTH DEPARTMENTS, AND OTHER PARTNERS TO MANAGE AND SHARE INFORMATION.

THIS PLATFORM HAS BEEN ADOPTED BY PA DOH AND THE REGIONAL HEALTH CARE COALITIONS TO PROVIDE NOTIFICATIONS TO KEY PARTNERS. THE SYSTEM ALSO TRACKS RESOURCES AND PATIENTS DURING INCIDENTS.

## ALERTS & NOTIFICATIONS

You can now receive alerts via emails, voice, texts, web, and app notifications. From inclement weather to mass casualty incidents, you can receive the latest alerts and report statuses in seconds, no matter where you are.

## POWERFUL TOOLS

Whether you are managing an exercise, planning for an emergency, or responding to an incident, there are many features on HIMS to help you manage and document. From incident logs to after-action reports, from response plans to HVA, HIMS offers many tools to help you get the job done fast.

## MOBILE AND WEB APPS

You can now access the platforms using a mobile device or computer. The advanced features on both web and mobile apps allow you to manage incidents, alert your incident command team, and document your response anywhere, anytime.
